To Whom It May Concern,

My name is Lucas Saucer and I am interested in employment at your corporation within the field of software development. I am currently a graduate student and seeking an employer that can help me to forge a new career with the end goal of becoming a security engineer.

Although currently seeking my first paid job within the field of software development, I believe I am the right person for the job for a myriad of reasons. Having spent the past seventeen years working within the hospitality and service industries, I have developed many soft-skills including how to train and develop other employees, communicate effectively under stressful situations and work together as a team with a myriad of diverse employees and clients. Aside from having years of customer service, hospitality and management experience, I have also spent the formative years of my childhood working on farms in the Midwest. The experience of working on large agricultural farms has helped to imprint on me the values of hard-work and long hours no matter what environmental stressors the workday may bring.

Over the past three years I have decided to continue my education through the State University of New York at multiple community colleges, with Ulster Community College being the primary institution for my education. While at Ulster Community College, I have taken a total of 44 credit hours of courses within the Computer Science department. Aside from taking accredited computer science programs in Object-Oriented Programming, Assembly Languages, Web Application Development, Mobile Application Development and Game Design, I have also sought out an education in Information Technology through CompTIA, TryHackMe, Codecademy and the ARRL. I believe that these educational opportunities have provided me with the education and discipline necessary to attend the Graduate Computer Science Program at SUNY New Paltz, which I hope to complete by Spring of 2026.

Aside from educational endeavors, I tend to find myself spending my personal time engaged in outdoor activities and home remodels with my wife and child in Kingston, New York. Thank you for your consideration and time in reviewing my interest in employment. I hope to hear back from you in the near future.

Sincerely,

Lucas Saucer
